

## **CSR SUPPLIER ENGAGEMENT PROGRAM**

### **Philosophy**

For M1 Composites, responsible management undertakes the mission of being the Partner of choice for its customers, supported by its corporate social responsibility (CSR) approach. Our governance processes aim to meet the expectations of our customers, while preserving a sustainable business model for our employees, our suppliers, the communities in which we operate and governments.

### **Liability / Suppliers**

We work closely with suppliers in our supply chain to maintain strong relationships. We strive to establish an effective, sustainable and socially responsible partnership with our suppliers. A quality relationship is a long-lasting relationship.

### **Supplier relations**

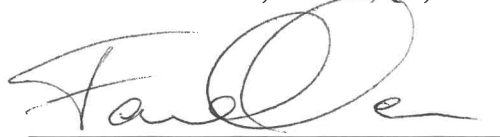

M1 Composites establishes clear guidelines for its suppliers. The M1 Composites Quality Manual aims to facilitate supplier compliance with its requirements. It is part of M1 Composites' constant effort to achieve quality policy objectives by improving supplier quality processes. M1 Composites' quality policy is to align all elements of the organization to provide world-class products and services at all times that meet or exceed customer expectations and to promote a culture of continuous improvement. focused on efficient processes.

The relationship with our suppliers is not based only on margins and costs. Depending on the products, suppliers will want to develop a relationship based on the development and sustainability prospects of our collaboration. It is up to us, as the customer, to assert our needs, in particular by clearly defining the environmental requirements on the products and the manufacturing processes, where possible, our requirements in terms of production conditions, and also quality control.

### **Checks**

M1 Composites reserves the right to carry out spot checks and verifications with its suppliers by means of questionnaires and visits. In the event of non-compliance with our supplier manual, we establish a corrective action plan with the supplier to remedy the situation.
